

FUSION-Link THE EXCLUSIVE DIFFERENCE

FUSION's 700 Series is the most versatile, easy to use and fully-featured Marine Entertainment System ever, with World's-First exclusive features. FUSION-Link software enables skippers to simply control the 700 Series Entertainment System, using multi-purpose displays that are FUSION-Link compatible.

FUSION-Link partnered Multi-Purpose Displays like Chartplotters and Fish-Finders become the entertainment control centre for the entire vessel.

Visit www.fusionelectronics.com for details of compatible FUSION-Link partnered products.

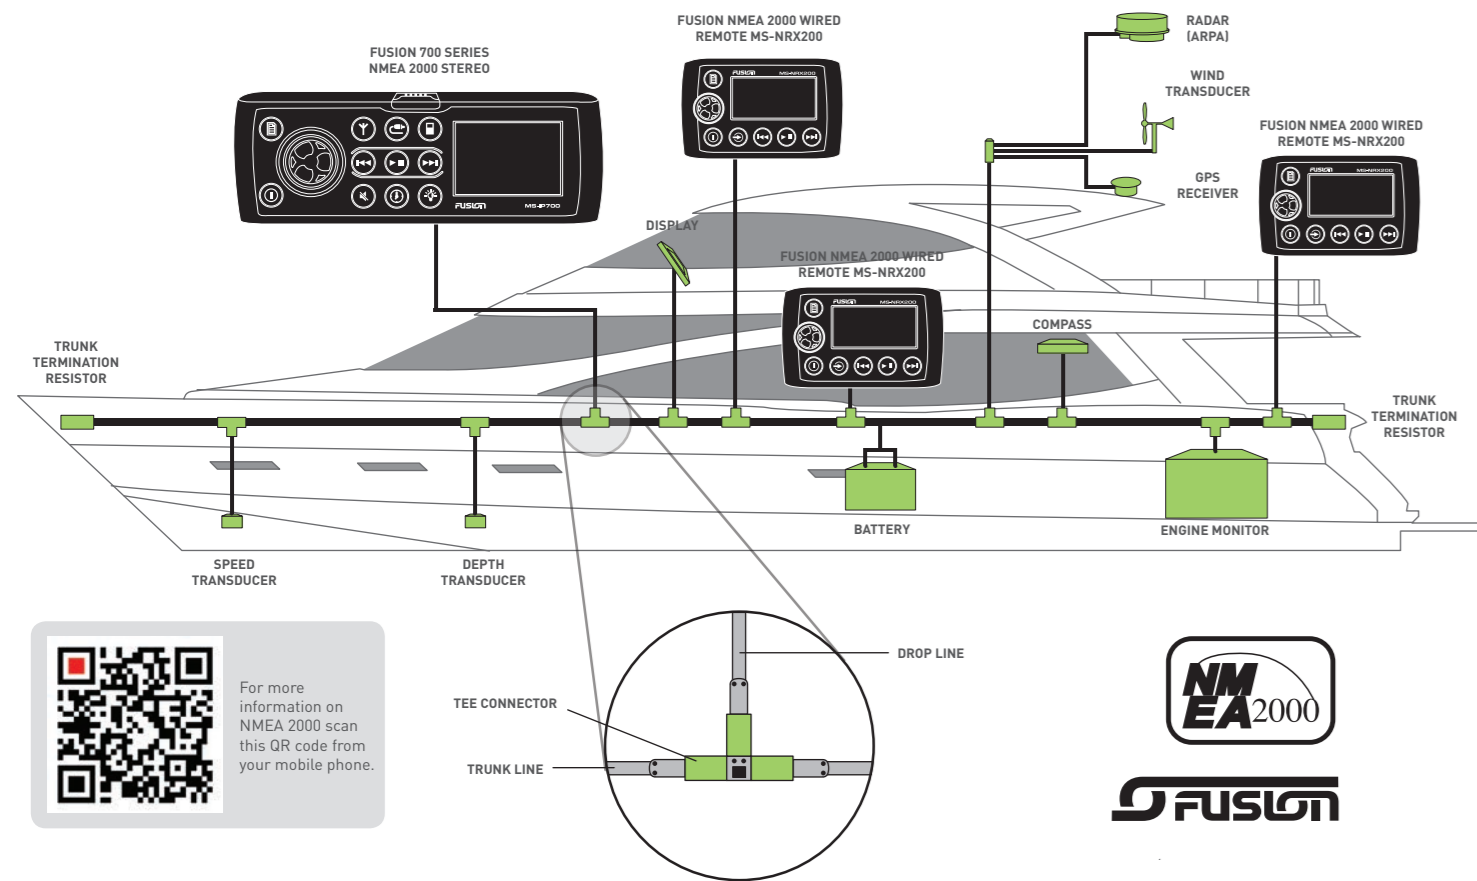

NMEA 2000® - COMMUNICATION NETWORK

The FUSION 700 Series is a NMEA 2000 Certified marine device. NMEA 2000 is the standard marine protocol onboard many vessels, this enables electronic equipment hard wired into the NMEA 2000 Bus the ability to communicate with each other. Many boats with multi-purpose displays at the helm or electronic engine control will already have the NMEA 2000 communication network installed. FUSION's 700 Series entertainment system can connect to the network and communicate with other compatible NMEA 2000 devices. FUSION-Link compatible NMEA 2000 multifunction displays can control the 700 Series entertainment experience from the display itself.

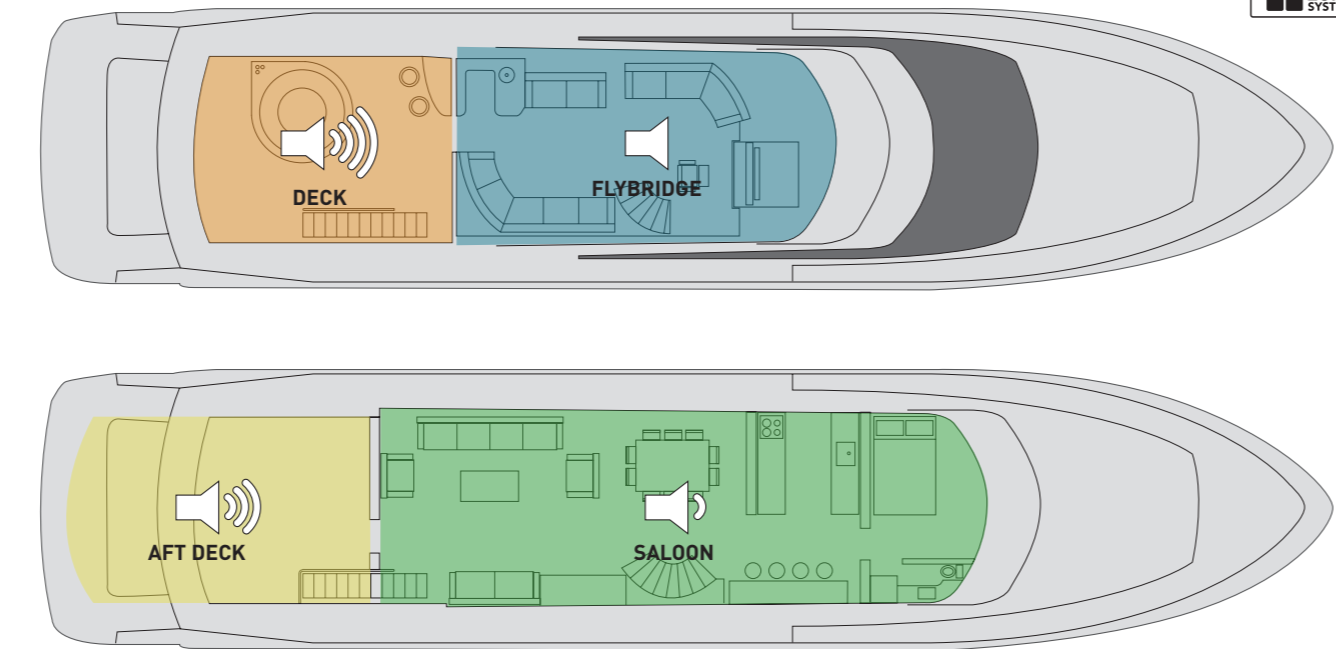

Another huge advantage - FUSION's MS-NRX200 wired remote controls can connect to the NMEA 2000 Bus, removing the need to wire back to the stereo unit. The communication is both ways, as FUSION's MS-NRX200 remote can repeat NMEA data like depth, speed and wind direction on the remote's screen.

Smaller or older vessels without NMEA 2000 can still have FUSION MS-NRX200 wired remotes in almost any location. Or for absolute simplicity, the 700 Series can be controlled at the Entertainment unit. A FUSION NMEA 2000 starter kit (MS-N2KSTART or MS-N2KCONN) is required for NMEA 2000 connectivity.

ADVANCED MULTI-ZONE TECHNOLOGY - 4 SEPARATE ZONES

FUSION's 700 Series has independent control of balance, subwoofer and volume in four separate listening zones. To ensure ease of use, zones can be named: For example; Flybridge, Saloon, Deck and AFT Deck — remotely to instantly see which zone you are adjusting. The 700 Series has two Hi-Fi Class-D amplified Zones, plus two Zones ready to be connected to a FUSION ultra-compact zone amplifier or a larger marine amplifier for increased sound and outstanding bass. Every Zone has stereo line level audio and subwoofer out, plus independent volume control, so it's easy to bring an amazing home theatre experience to your boat.

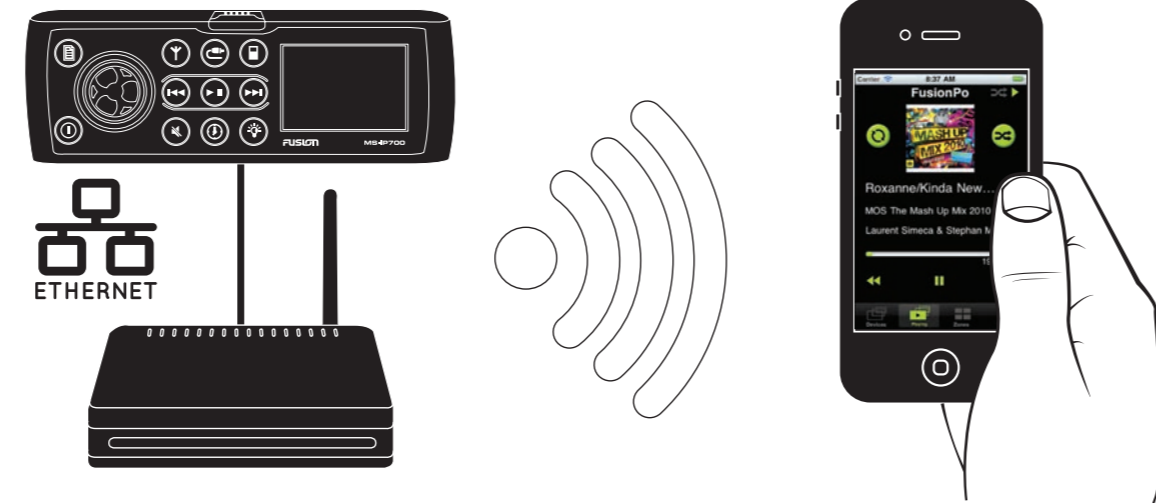

SMART WIRING SOLUTIONS

For vessels with an existing FUSION 600 series stereo and remote installation, the FUSION 700 series and MS-NRX200 wired remotes will connect directly into the existing wiring with the addition of the FUSION Tee Piece supplied. The 700 Series is not backwards compatible with existing wired remotes.

ETHERNET - FULL WIRELESS CONTROL

Imagine full Wireless control of your FUSION 700 system anywhere on your boat from devices like the iPhone®. Add a Wi-Fi wireless router to the 700 Series Entertainment System and Apple® devices like the iPhone, iPod touch® and various Android products can wirelessly control the audio around the boat. Apps are available for download to enable iPhone, iPod touch, Android or PC wireless control. (See www.fusionelectronics.com for further connection details)

MUSIC SOURCES

MS-AV700
AM, FM, CD, DVD, AUX

Auxiliary In (AUX) connects MP3 players to the stereo unit for music playback. Connect the optional MS-DKIPUSB Dock for USB, iPod or iPhone music playback.

MS-IP700
AM, FM, USB, iPod, iPhone, AUX

VHF RECEIVER

Monitor Marine VHF channels through the stereo speakers of your 700 Series Entertainment System for Weather reports, Coast Guard information, chatter from other boats and more. Features include an adjustable squelch to eliminate background noise between conversations, Channel Scan and user pre-sets, so you can instantly listen to your favourite channels, like the Weather.

USB PLAYBACK

Listen to your favourite MP3 music stored on a USB flash drive. Simply insert the USB directly into the MS-IP700 unit, protecting the drive from the elements then sit back and enjoy the music. Note: The MS-AV700 requires the optional MS-DKIPUSB dock for USB playback

As FUSION increases functionality, you can add new features by downloading updates from the website onto a USB flash drive, then inserting it into the USB dock of your 700 Series stereo unit. Visit www.fusionelectronics.com for the latest software.

CONTROL iPod MUSIC LIBRARY

FUSION's 700 Series replicates the iPod Music interface, for simple navigation and control of audio. iPod album art is displayed in colour on the 700 Series LCD screen and FUSION-Link mobile Apps. When listening to music from iPhone, an incoming call will automatically mute the music. For supported Apple models visit www.fusionelectronics.com

VIDEO PLAYBACK

Enjoy iTunes music and video from iPod or iPhone inside the MS-IP700. Display the video on televisions or monitors with composite video in sockets. The MS-AV700 will play video from the in-built DVD player. For iPod and iPhone video playback the MS-AV700 requires the optional Marine Portable Media Device Dock (MS-DKIPUSB). MS-AV700 comes complete with Infrared remote control for full control of the entertainment system.

FEATURES

- 280 Watt Total Output
- Hi-Fi Class-D Amplifier
- Daylight viewable 2.7" colour TFT LCD screen
- Rugged aluminium diecast chassis
- Powerful ARM 9 350MHz processor
- 360° IPx5 water resistance
- Ethernet Connectivity
- NMEA 2000 Connectivity
- FUSION-Link capable
- 4 Zone Support - Zones are nameable
- MS-IP700: AM/FM/VHF/iPod/iPhone/AUX/USB/Sirius XM ready. Features internal waterproof docks for iPod, iPhone and USB.
- MS-AV700: AM/FM/VHF/DVD/CD/AUX/USB/Sirius XM ready. Can be expanded with the optional MS-DKIPUSB Dock to house and replay iPod and iPhone.
- Customizable AUX screen - select from an image of a TV/DVD/ Game or Portable media device
- Control of the iPod Music Library
- iPod/iPhone track art displayed in colour
- Amazingly Simple Controls - Most operations are controlled by the rotary encoder.
- Multi language user interface - English, French, Italian, German, Spanish and Dutch
- Key and LCD adjustable Backlighting.
- 12 or 24 hour clock with alarm function
- Sirius reception (USA-only) enabled through optional Sirius receivers.

FUSION 700 SERIES WIRED REMOTE - MS-NRX200

FUSION's new advanced 700 Series wired remotes are NMEA 2000 certified for connection directly into the NMEA Bus of your vessel. FUSION's wired remote solutions offer complete control of the audio Zones and all stereo sources. Most stereo functions are replicated by the remote control's user-interface, so the remote is as easy to use as the 700 Series stereo unit. Wiring directly into the NMEA Bus removes the need to run cable back to the 700 Series stereo, for vessels not NMEA 2000 enabled, the remote can still be wired conventionally.

REMOTE ALSO FUNCTIONS AS A NMEA 2000® REPEATER

The MS-NRX200 wired remote can tap into other NMEA 2000 devices connected to the NMEA bus, to display information like depth, speed and wind direction on the LCD screen.

FEATURES

- Compatible with both the MS-IP700 and MS-AV700
- NMEA 2000 Connectivity
- IPx7 water resistant
- Ideal for cockpits, swim platforms etc
- FUSION-Link capable
- Large 2.6" Monochrome FSTN LCD screen
- 128 x 64 pixels
- Screen is high contrast, viewable in direct sunlight
- Key and LCD adjustable Backlighting.
- 32 Bit Micro Processor
- Control multiple 700 Series stereo units connected to the NMEA 2000 Network
- NMEA 2000 Repeater - displays basic information from units connected to the NMEA 2000 network
- Compact size for ease of installation
- FUSION Alpha Search Technology

FUSION TRUE MARINE - BENCHMARK QUALITY

True Marine is FUSION's innovative industry-leading marine entertainment range, designed and engineered in New Zealand by marine experts specifically for use on the water. True Marine products withstand the elements - water, wind, salt and sun, even after extended exposure to the marine environment.

True Marine products comply with, or surpass international IPx5 waterproof standards. All True Marine products are designed with practicality and ease of use in mind, incorporating features that enhance the boating experience.

All FUSION True Marine products are backed by a 3 year consumer warranty with full support from fully owned subsidiaries and a worldwide network of distributors.

Trust any FUSION product displaying the True Marine stamp of accreditation.

FAMILY, FRIENDS, FUSION

IT'S WHAT BOATING IS ALL ABOUT.

ACCESSORIES

PORTABLE MEDIA DEVICE DOCK MS-DKIPUSB

Connect the Portable Media Device Dock (MS-DKIPUSB) to the Marine DVD Entertainment System (MS-AV700) to provide the additional benefit of an integrated housing for your iPod or iPhone. The bulkhead mount dock complies with IPx5 water resistant standards, protecting your iPod/iPhone from the harsh marine environment. Featuring composite video out which enables iPod/iPhone video playback on a compatible monitor or television. The Portable Media Device Dock can be flush or wall mounted.

MS-DKIPUSB

MS-N2KSTART

Connect your 700 Series Marine Entertainment unit to the NMEA 2000 Bus of your vessel with the FUSION MS-N2KSTART starter pack. Contents include:
2x FUSION to NMEA Drop Cable
1x NMEA 6m Ext Cable
3x NMEA T-Connectors
1x Male NMEA Terminator
1x Female NMEA Terminator
1x 1M NMEA Power Cable

MS-N2KCONN

Connect your FUSION 700 Series wired remote to the NMEA 2000 Bus of your vessel with the FUSION MS-N2KCONN wiring kit. Contents include:
1x FUSION to NMEA Drop Cable
1x NMEA T-Connectors

GENERAL

Operating Voltage: +10.2 - 16 VDC
Fuse Rating: 15 Amp
DVD Player
Laser power: Class I
Power Output
Maximum: 70W x 4
26 WRMS per channel @ 4 ohms
45 WRMS per channel @ 2 ohms
Pre-Output Voltage: 2.5 V RMS

WIRED REMOTE

MS-NRX200
Mounting diameter 50mm (2")
Screen: 2.7" monochrome dot-matrix LCD, 128x64 dots
7-way Mini-DIN
Connection:
Compatible with: MS-IP700, MS-AV700

PORTABLE MEDIA DEVICE DOCK

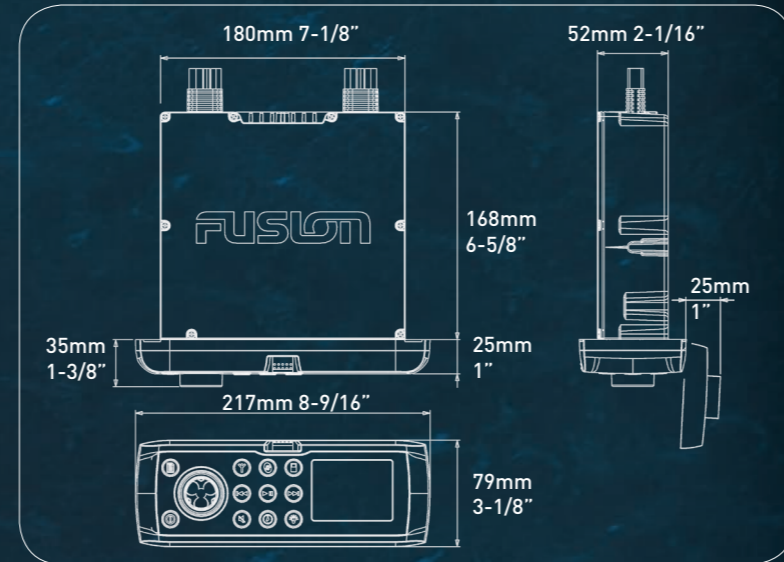

MS-DKIPUSB
Cut-out hole: 126mm x 39mm
Compatible with: MS-AV700

MADE FOR:

iPhone 4
iPhone 3GS
iPhone 3
iPod touch (2nd, 3rd and 4th generation)
iPod nano (4th, 5th and 6th generation)
iPod classic
